Width : 6 du bronze 4 cm du socle 6,5cm

Height : du bronze 8 cm environ

Depth : épaisseur du socle 2,5 cm

Description

A silver-plated bronze wild goose from the 1930s (Art Deco) mounted on a hardstone base. Tiny chips at the corners of the base, almost invisible. This is most certainly a mascot that was mounted on a car radiator cap (see the rusted rod and nut on the stone base). A mascot with its aged patina that one can easily imagine on the front of the long hood of a beautiful 1930s limousine.
