

Platinum Ring With A 10.40-carat Cabochon Opal And 4.50 Carats Of Emeralds

4 390 EUR

Period : 20th century

Condition : Très bon état

Material : Platinum

Description

An elegant and striking platinum ring, featuring a dramatic oval design with a cabochon-cut opal weighing approximately 10.40 carats at its center. The opal features a smooth, domed surface and deep, dark hues, which give the center stone a particularly intense and distinctive appearance. Framing the opal is a refined band of square-cut emeralds, with an estimated total weight of approximately 4.50 carats. The intense green of the emeralds creates an elegant chromatic contrast with the center stone and harmoniously enhances its oval profile. The solid platinum setting, characterized by clean and simple lines, completes the composition, giving the ring a precious appearance and a strong presence. The top section measures approximately 2.50 x 2.00 cm, dimensions that make the piece
