

18k Yellow Gold Ring With A 3.11-carat Natural, Untreated Sapphire And Diamonds

7 500 EUR

Period : 20th century

Condition : Bon état

Material : Gold

Description

This 18-karat yellow gold ring showcases a remarkable 3.11-carat natural, unheated sapphire, whose deep blue hue lends the piece a particularly refined presence. Oval in shape, the sapphire measures 10.81 x 7.90 x 4.45 mm. Its color is described as deep blue to dark blue, with good transparency. The ring is also accented by four old-cut diamonds, arranged in pairs on the shoulders of the setting. Their total weight is estimated at approximately 0.60 carats. The sapphire is accompanied by ALGT gemological report no. 72086557. Analysis confirms that it is a natural corundum and reveals no evidence of heat treatment. Metal: 18-karat yellow gold, 750/1000 Hallmark: eagle's head Center stone: Natural, unheated sapphire in an oval cut, 3.11 carats Color: Deep blue to dark
