Description

Multilayered glass candy dish by Gallé - Lakeside designAn elegant multilayered glass candy dish by Gallé, circular and slightly domed in shape, adorned with a superb lakeside design in a warm palette of brown, amber, orange, and green.The lid features a landscape reminiscent of a pond or lake, with a tree standing out against a luminous background and vegetation bordering the scene. The lower part of the box is embellished with a floral and foliage motif, rendered in relief and acid-etched, which harmoniously complements the composition.The transparency and nuances of the glass create beautiful effects of depth and light, characteristic of Émile Gallé's Art Nouveau works.The piece bears a "Gallé" signature on the lid.Period: Art Nouveau, circa 1900Artist / Manufacturer: Émile Gallé, NancyTechnique:
