Description

Elegant ring crafted in 18K white gold in the early 2000s, with a graphic, structured and refined design inspired by the Art Deco aesthetic. The ring is centered with a natural blue zircon weighing approximately 6 carats, cut in an elongated rectangular shape and measuring approximately 11 x 6 mm. The stone displays beautiful transparency and a pure, luminous and captivating blue, with subtle variations depending on the light. The mount, both understated and architectural, is designed to highlight the central stone. It is accented with approximately 0.29 carat of diamonds, discreetly arranged to enhance the geometric lines of the composition. The elongated shape gives the ring a beautiful presence on the hand while maintaining an elegant and balanced appearance. Details: Period:
