Description

By André Aucoc, a very beautiful serving dish resting on a solid silver pedestal with perforated design. The rim, featuring double molded fillets, is encircled by a generous laurel leaf frieze that is also found on the base. It is openworked with radiating fluted motifs, a frieze of pearls, and delicate lily buds in each space. Extremely elegant, this imposing and sturdy platter is in excellent condition, with only minor scratches from use, no chips or dents, and ready for immediate use. The exceptional density of the metalwork is once again evident in this master silversmith's work. Overall height: 6.5 cm / 2.56 in. Base diameter: 10.5 cm / 4.13 in. Platter diameter - Top diameter: 26.5 cm / 10.43 in. Total weight of solid silver - Sterling silver weight: 846 g. Another serving dish from the same pair
