Description

Long antique chain, antique watch chain, consisting of double-link chains. A large spring ring is attached to one end. Period: 20th century Main material: yellow gold, 750 parts per thousand, 18 karats. Dimensions: Length: approx. 78.5 cm, width: approx. 2.6 mm. Net weight: approx. 16.2 g. Authentic antique jewelry--crafted in the early 20th century. Our opinion: These long antique chains were originally used to hold pocket watches; today, they can be worn in multiple strands--with or without using the spring ring to split them--or a pendant can be attached to them.
