Description

Toso Murano - Large solid glass vase with gold dust inclusions - 20th century Large sculptural vase by Toso Murano, made of solid glass with gold dust inclusions. The vase features a distinctive flattened shape, with broad shoulders, a narrow neck, and two raised side edges, embellished with transparent yellow glass appliques. The body, characterized by a dense texture of metallic inclusions against a purplish background, features a large abstract decoration in intense cobalt blue glass on the front. On the back, a series of yellow glass appliques arranged in concentric arcs completes the composition. The transparency of the solid glass and the chromatic contrasts give the object a distinctive decorative presence. Mark: Toso Murano. Bibliographic and auction reference: Pandolfini Auction House,
