Description

A large pocket watch...With multiple movements...Hour, second, and, most importantly, an alarm...Made of solid nickel-plated silver...Inspected, but the hallmarks are very worn...Or, for those who find the interior too small...!That is, 800/1000...The crystal isn't glass...!It must have been replaced...From the 1860s...By the watchmaker PÉLICAN - FRANCE...Most likely from Paris...It's currently in working condition...There are flaws in the dial's enamel...And in the nickel plating...The chime works...The hand adjustment works...The rest needs servicing...For now, if I find a clockmaker who can do something about it, I'll have it done...So for now, I'm leaving it as-is...The price reflects that...This is the first one I've ever seen or come across...!Weight... about
