Description

A stunning pair of KANU Model 296 armchairs, designed by Konstantin Grcic for Cassina, an iconic Italian manufacturer of contemporary design. Crafted from bent plywood with an American walnut finish, these armchairs stand out for their striking semicircular silhouette and sculptural construction. The wood elegantly follows the enveloping shape of the backrest and seat, creating a piece that is at once minimalist, architectural, and particularly expressive. The magnificent grain of the walnut further emphasizes the purity of their lines. The armchairs bear the Cassina mark, certifying their authenticity. An iconic piece of contemporary Italian design, particularly sought after for its radical and timeless aesthetic. Designer: Konstantin Grcic Model: KANU
