Description

A piece of animal-inspired jewelry by Pieper, combining an 18-karat yellow gold frog with a baroque pearl, whose irregular contours and iridescent sheen create a unique design. Sculpted in relief, the frog appears to be clinging to the cross-shaped pearl. Its body and legs are adorned with 38 diamonds totaling approximately 1 carat. Four rubies, weighing a total of approximately 0.30 carats, illuminate its back, while two sapphires totaling approximately 0.20 carats define its gaze. The finely detailed legs and the three-dimensionality of the design lend this creation an expressive and original character. A bail allows the piece to be worn as a pendant, while a long pin on the back enables it to be pinned to the lapel of a garment. A captivating piece for lovers of animal-themed jewelry and
