Chest Of Drawers

Description

This antique English chest of drawers is a classic piece of furniture crafted from solid wood. Its traditional silhouette and sturdy construction make it a timeless, functional addition to any interior. The piece features a practical layout with five drawers--two smaller ones at the top and three larger ones below--all fitted with round, turned-wood knobs. It stands on turned front legs characteristic of 19th-century English style, while the rear base is simple in design. The wood finish displays a rich, warm brown hue that highlights the material's natural grain. In good overall condition, the chest has endured the test of time while retaining its authentic character; it bears an original patina that reflects its history and use. Its structural elements and hardware are period-authentic, adding to its vintage charm.

750 EUR
