Large Decorative Painting Of An Italian-style Garden

850 EUR

Period : 19th century

Condition : Bon état

Material : Oil painting

Width : 120

Height : 145

Description

Characteristics of the WorkComposition: The painting depicts an Italian-style park or garden featuring a large central waterfall, flanked by lion-headed fountains and topped by a massive jet of water rising toward the sky. An imposing dead tree on the left creates a picturesque contrast with the tall, vertical cypress trees that frame the background. Decorative Elements: On the right, a full-length antique statue stands on a pedestal, evoking the neoclassical style and the theme of ruins dear to the artist. At the foot of the statue, one can see a painter's tools (canvas, easel, brushes, or canes). Composition: The foreground is animated by classic folk figures, notably a laundress kneeling at the edge of the pond and a woman carrying a basket on her head, accompanied by a child. This aesthetic perfectly
