Description

A Louis XV-era chest of drawers made of solid walnut, dating from the 18th century, restored in our workshop and in perfect condition (by a cabinetmaker certified by the École Boulle). It was made in Paris, in the Faubourg Saint-Antoine, a neighborhood renowned for its many cabinetmaking workshops in the 18th century. It features a beautiful curved front adorned with elegant moldings, three rows of drawers--two large and two small--with a secret drawer in the middle; they are adorned with original bronze handles and a top with rounded lines. (stain-resistant treatment) The walnut has a lovely, warm patina that highlights the charm and authenticity of this antique piece, characteristic of Parisian furniture from that era.
