Description

A Baroque-style cabinet dating from the late 19th century, crafted from walnut-stained beech. The cabinet features a front with a pair of paneled doors, each divided into two sections embellished with high-relief panels. The side and center posts lend the piece additional sturdiness and refinement, while the sides--also paneled and divided into two parts--complete its elegance. The top is embellished with a scalloped frame that adds a distinctive decorative touch. The base is supported by double-shelf feet, a feature that enhances its stability and style. Perfect for spaces that call for a touch of history and class. Product condition: Due to its age and wear, this product requires restoration and refinishing. We strive to present the actual condition of the piece as fully as possible through the photos. If certain details
