

Walnut Dining Table

5 000 EUR

Period : 19th century

Condition : Très bon état

Description

A very beautiful dining table made of solid walnut. It is a highly decorative piece, in excellent condition, with a very interesting and unusual design. In fact, it stands on four baluster-shaped legs that are connected by a central base. The tabletop is stunning, featuring two-tone wood hues that give it depth. The advantage of this table is its size; once extended, it offers extraordinary dimensions. It can extend to a total length of 8.85 meters. These are the dimensions of a table found in a castle or a grand mansion... With a very beautiful original patina, this table dates from the Napoleon III era. The sliding mechanism inside the tabletop is entirely original and made of solid oak. It functions perfectly for opening and closing the table. This table is sold without extension leaves. Made in
