

18-karat White Gold Ring Set With Diamonds

3 800 EUR

Period : 20th century

Condition : Parfait état

Width : 1.7

Height : 3

Depth : 1.7

Description

White gold ring set with diamonds in a classic cluster arrangement. Set in the center is a 0.50 ct round brilliant-cut diamond with the following declared characteristics: color I-J, clarity I2. The center stone is surrounded by twelve marquise-cut diamonds with a total weight of 1.10 ct, as well as two round brilliant-cut diamonds with a total weight of 0.42 ct. The accent diamonds have a clarity grade of VS-SI. The cluster setting creates a radiant composition that optimizes light reflection and enhances the overall brilliance of the piece. The white gold setting highlights the optical qualities of the diamonds and follows the tradition of classic fine jewelry. The ring comes with a certificate from the Latvian Precious Metals Control Bureau, No. 3-9-6472022, confirming the
