Length : 50

Width : 4.4

Height : 4.4

Description

Swiss wristwatch with a chronograph function, crafted according to Hublot's iconic "Art of Fusion" concept, combining fine watchmaking, innovative materials, and a bold, contemporary design. The Big Bang Diamond model, reference 301.SE.230.RW.1, is housed in a 44-mm stainless steel case with a contrasting black ceramic insert. The bezel is set with brilliant-cut diamonds, giving the watch a jewel-like quality while retaining its sporty and architectural character. The white dial, adorned with applied Arabic numerals and luminescent hands, features three chronograph counters and a date window. The watch is mounted on a white rubber strap with the brand's signature and a folding clasp. The automatic movement offers a power reserve of approximately 42 hours. Water-resistant to 100
