Depth : 50 cm

### Description

Marble side table by Jacques Goossens-Bara. A square table featuring a removable marble top and a geometric base made of patinated metal. The base is constructed from square-section tubes with offset horizontal bars, which create the illusion of suspension just below the marble top, perfectly embodying architectural functionalism. Jacques Goossens-Bara was a major figure in postwar Belgian functionalism, an architectural movement that emphasized clean lines, structural honesty, and spatial efficiency to promote urban renewal. A 1952 graduate of the Brussels Academy, his first building immediately won the Ven Prize for Architecture in 1955. At the 1958 World's Fair, he designed the International Red Cross Pavilion and the Transportation Pavilion (in collaboration with Robert Courtois, Henri Montois, and others),

which won the Reynolds Memorial Award from the American Institute of Architects. 50 cm wide and deep, 43.5 cm high. The marble top is 3 cm thick. Total weight: 26.3 kg (the marble top weighs 20.5 kg and the metal base weighs 5.8 kg). An architectural and historical piece of mid-century Belgian design.
