Scale Model Of A Horizontal Spinning Wheel Made Of Turned Wood - Master's Thesis Project.

225 EUR

Period : 20th century

Condition : Bon état

Material : Other

Description

Scale model of a horizontal spinning wheel made of turned wood--a master's thesis project.A rare and superb miniature model of a horizontal tabletop spinning wheel, crafted from turned wood. This exquisite piece is more akin to a master's thesis project than a child's toy, executed with great technical precision.Features and Highlights:Material: Finely turned solid hardwood, featuring a warm and uniform patina.Workmanship: The proportions are perfectly accurate. The uprights are topped with delicate, pointed brass finials, characteristic of display pieces.Fully functional mechanism: The entire mechanism is operational. The foot pedal (treadle) drives the spoked wheel perfectly. The spindle system, with its bobbin and spindle shaft, is complete and mounted on a carriage adjustable
