Description

A set of six stylized birds crafted from antique silver-plated copper spoons and forks. The spoon bowls form the tapered bodies; the handles--bent or extended--form the necks, beaks, and legs. The birds are depicted in a variety of poses. This approach to repurposing everyday utensils evokes the world of Abraham Habbah (1927-1998), who, beginning in the 1960s, developed an art form based primarily on forks and spoons.Various heights: 24 - 21 - 19 - 13 - 8 cm
