Description

- This volume No. 6 is untrimmed, which explains the absence of a photo of the title page, as well as part of the tables of illustrated plates - - Therefore, it is uncut and has likely never been read, given the excellent condition of the book's interior, which was printed for the Chair of Group 1 of the international jury: Mr. Ch. Genuys - - The cover is in good condition; note two tiny tears on the back cover (see photos); however, these outer covers do show signs of their hundred years--they are slightly yellowed and not as clean as the interior, and there is foxing on the edge (see photo) - Illustrated with 96 full-page plates, some in color, preceded by 56 pages of text - French and Foreign sections, covering both the Textiles chapter and the Paper chapter - - Printed in 1925 by the Imprimerie
