Ring With A Horseman Motif - Senoufo

65 EUR

Period : Before 16th century

Condition : En l'etat

Material : Bronze

Diameter : 2,5

Height : 7

Depth : 4,2

Description

The rider is depicted in a schematic manner. The animal has a prominent muzzle and a compact body. The overall effect reflects a deliberate effort at stylization and economy of form. The surface has a dark, uneven patina with areas of wear. The equestrian motif is found in various artistic traditions of West Africa, where it may symbolize prestige, authority, or social status.
