Description

Master's thesis project in cabinetmaking. The technique of assembling wood pieces allows for the creation of surprising and original designs, achieved by rotating the pieces, which gradually reveal the different types of wood. These pieces had to be fitted together perfectly; otherwise, an unsightly misalignment in the patterns would immediately become apparent. This piece likely dates from the late 19th century; it is made from woods such as sycamore, mahogany, oak, bird's-eye maple, and cherry...Shipping available in France and internationally; contact me for details
