## Description

Pair of candlesticks by silversmith Cailar-Bayard (1848-1934).These are so-called "à la financière" models in silver-plated metal, with the silver plating in very good condition.The shafts are fluted with ridges, adorned with asparagus motifs, resting on a quadrangular base decorated with waterleaf motifs.They are in the Louis XVI style and would make a great gift idea for the holiday season.There is a very slight lack of parallelism due to the silversmith's artisanal craftsmanship.Price ex-Gallery in Vichy.
