Description

Flying Mercury - Bronze statue based on a work by Jean de Bologne - Height 82 cmAn elegant bronze sculpture depicting Flying Mercury, based on the famous work by Jean de Bologne (1529-1608), known as Giambologna, a master of Renaissance sculpture.As the messenger of the gods, Mercury is depicted in an ethereal pose, whose momentum and lightness characterize this iconic composition. The figure's balance, the fluidity of its movement, and the elegance of its proportions give this piece its striking presence.Standing 82 cm tall, this sculpture is a beautiful decorative piece, designed to be placed on a console table, a small side table, or a piece of antique furniture. Its classical subject fits equally well in a traditional interior as it does in a contemporary setting.Material: bronze.Model:
