300 EUR

Period : 20th century

Condition : Très bon état

Material : Other

Diameter : 39cm

Height : 75cm x 55cm

Description

This elegant, tall table lamp stands out for its sculpted base in the shape of a twisted baluster vase, directly inspired by the decorative arts of the Classical period and the 18th century. Crafted from resin that perfectly mimics black marble with a satin finish, the base features wide helical fluting that lends it a stunning twisted effect and creates a very refined interplay of light and shadow. The entire piece rests on a molded circular base, which is itself anchored to a solid square plinth. The design is crowned by a conical lampshade in a vibrant magenta/fuchsia red, adding a dynamic, warm touch to this classic and timeless lamp.
