Description

Pair of large antique turned brass candlesticks - 19th century A beautiful pair of large antique brass candlesticks, featuring an elegant, slender silhouette and interesting turned detailing.Each candlestick rests on a wide, stepped circular base, adorned with concentric moldings, which extends into a turned shaft decorated with successive rings.The central section features a prominent, beveled bowl, surmounting a wide circular candle holder decorated with concentric circles and edged with a delicate serrated frieze.The piece as a whole offers a beautiful balance of proportions and pleasing symmetry.The brass has a lovely antique patina with golden hues, along with some traces of oxidation and wear that add to the charm of these pieces.This pair of candlesticks will naturally find its place on a mantelpiece, a
