Description

Antique 18th- or 19th-century separ shield. Persia, Qajar Dynasty.An antique, round Indo-Persian-style parade and combat shield, known as a separ (or sipar, dhal).Materials and construction: Forged steel (or iron alloy), often richly engraved with acid etching and decorated using the koftgari technique (inlaying or weaving gold or silver ornaments into the metal surface).Construction: A circular, convex shield with four decorative bosses arranged around a central boss, used to parry blows from melee weapons. The entire shield is covered with a dense and complex floral or plant motif, or with figurative scenes.Very good condition, original patina.Origin: Persia, late 18th/early 19th century.Dimensions: Shield diameter: 47 cm; helmet height: approx. 27 cm.The gallery issues a
