Wooden Sieves Or Screens

165 EUR

Period : 19th century

Condition : Très bon état

Material : Other

Description

It was still physically demanding to be an apprenticeat the drugstore... It was often the "youngster" who had to get to worksifting the powders... We breathed in a lot of it...From talcum powder to baking soda, from alum powder to God knows what--we'd sometimes cough...These three wooden sieves, stacked inorder of decreasing mesh size, are in impeccable condition, yet bear the marks ofthe work of days gone by.
