# Large Octant, England, 1750-1770

1 400 EUR

Signature : inconnu

Period : 18th century

Condition : Bon état

Material : Solid wood

## Description

A large octant made of mahogany, boxwood, and brass; unsigned but of English origin, with a relatively early design dating from around 1750-1770, measuring 50 x 43 cm overall.The instrument is equipped with an eyepiece, a large primary mirror, and two secondary mirrors. The boxwood dial features a scale per transverse line. It has retained a double set of solar filters.The screw that adjusts the focus of the rotating arm is loose; otherwise, it is in good original condition.Dimensions: 50 x 43 cm.
