# Large Wooden Panel From Irian Jaya, Asmat, Oceania

1 200 EUR

Period : 20th century

Condition : Etat d'usage

## Description

I am offering this large painting/panel--an Asmat carved plank--featuring animal motifs, a snake, two opposing heads, and two figures facing each other at the top, set against a background of scales.Approximately 120 cm high by 60 cm wide, likely intended for shamanic use in inducing premonitory visions under the influence of psychedelics. Crafted from hardwood, this is an interesting and rare curiosity that is also highly decorative. From the collection of Nina Wolmark, a renowned creator of animated series in the 1980s (Rahan, Ulysse 31, etc.).
