Gold Ring With Aquamarine And Pearls

4 000 EUR

Period : 20th century

Condition : Parfait état

Description

There are countless adjectives that could describe this truly unique ring.It's an extravagant, enormous, luxurious, over-the-top, strange ring--completely outside the norm and conventional styles, unlike anything we're used to.But, above all, it is a beautiful ring.The central octagonal aquamarine measures 2 × 1.5 cm, but the ring's head, completely covered in pearls, measures over 3 × 3 cm.The pearls completely cover the shank and more than half of the band, which is itself massive and imposing.The ring weighs a total of 43.8 grams.I believe it is indeed the heaviest ring I have ever encountered in nearly thirty years of work.
