Capacity Measurements In The Early 20th Century In Serialization

285 EUR

Period : 20th century

Condition : Etat d'usage

Material : Metal

Height : 157 cm

Description

Crafted by a tinsmith, painted, and available in various sizes,these eleven nesting containers await you.Displaying them all in a single tower is quite afeat (I used to play with Kapla blocks with my grandson back in the day...) but even thoughthe smallest measuring cup taunts us from its height of 127 cm, we have to admit that it'snot very practical... Especially if you need the doubledecaliter...and the markings are reversed.These educational objects have been through manystudent adventures; in fact, the fourth one from the top has notfared well against the ravages of time... Oh well, it's part of the family.A rare complete set ranging from the double decaliter down to thedeciliter
