Rare Clock Depicting "the Discovery Of Static Electricity"

4 000 EUR

Period : 19th century

Condition : En l'etat

Height : 37,5

Description

Collectible clock depicting the discovery of static electricity.This clock commemorates the discovery (by Ramsden in 1768) that rubbing leather pads produces static electricity, which is stored in the Leyden jar.A female figure receives an electric shock, causing a concussion.The base is decorated with a bas-relief depicting a scientific theme.This rare clock rests on four spindle-shaped legs, features a white enamel dial, a movement that strikes the hours and half-hours, and a wire suspension.The clock is in its original condition and needs cleaning.Empire period; a French piece dating from around 1800.Note: The two candlesticks come from the same estate and are also available! Height of the clock = 37.5 cm Width of the clock = 30.5 cm Very rare model !
