Set Of Six 19th-century Ouraline Glass Tumblers

180 EUR

Period : 19th century

Condition : Parfait état

Material : Glass

Width : 6.5 cm

Diameter : 10 cm

Description

A beautiful set of six bulbous, ribbed goblets with flat bases in a color known as "ouraline." This unique color, which ranges from yellow to green with a very pleasant luminosity, is achieved through the use of uranium oxide during the glass-melting process. This technique proved to be highly toxic due to the fumes emitted during production and was quickly banned. Shipping available in France and internationally; please contact me for details
