## Description

ATMOS Clock by Jaeger-LeCoultreA perpetual-motion clock that operates using a sealed capsule containing a gas mixture that expands and contracts in response to temperature changes.The brass case, in perfect condition, is gold-plated.The transparent glass sides allow a view of the mechanism.The white-background dial is graduated, with Arabic numerals at 12, 3, 6, and 9 marking the hours, quarter-hours, and half-hours.The inscriptions on the dial read "Jaeger-LeCoultre 'Atmos' " and "Swiss Made."The caliber is 528-8, and the serial number is 369011, which likely indicates it was manufactured in 1972.H 231 mm W 209 mm D 162 mm
