is part of this series, which is rare on the market.It is a large oil-on-canvas painting, framed, signed and dated on the front, and titled on the back.This work is titled "Genesis" and dates from 1974.It is part of a series of four works.The well-preserved colors are noticeably less vibrant in person.This is because the painting is illuminated by gallery spotlights.It features a patinated solid wood frame.The canvas on the stretcher is well-preserved.It is therefore a rare work on the market--of fine quality, well-preserved, highly decorative, and spectacular on the wall, especially when displayed as a series.
