Description

This diptych model with oval views, made of gilded bronze and beveled glass, is very rare. Yet it represents a highly iconic style for a French photo frame--so typical with its easel-style structure and spring-mounted upper decoration. Its rarity lies primarily in its oval shape--and the fact that it is a diptych to boot. The bronze frame is of very high quality, and the Louis XVI-style pleated ribbon covers the entire width; the original beveled glass panels are in good condition. Dimensions for the oval photo: 10 x 14 cmShipping available in France and internationally; contact me for details
