Height : 36 cm

Description

A baluster-shaped potiche vase made of polychrome Chinese porcelain, decorated with roosters and swans on the body, dating from the late Qing Dynasty in the 19th century. It features an elegant baluster shape with a bulging body, a flared base, and a short, straight neck. Its richly painted decoration alternates between a deep black background and two large, multi-lobed white medallions.On one side, a large cartouche with a white background framed by a blue border depicts a rural scene featuring two roosters with brown, black, and white plumage. They stand on bluish rocks, surrounded by pink peonies and overlooked by the leafy branches of a tree.On the opposite side, a second medallion of the same shape reveals a peaceful aquatic scene featuring two white swans swimming on a pond. landscape is adorned with pink lotus leaves and flowers, a weeping willow, and two birds in flight across the sky.Between these designs, the glossy black background is entirely covered with a profusion of polychrome flowers (chrysanthemums, peonies, lotuses) and delicate foliage.This vase is in good condition and of superb quality. The richness of the decorations makes it a very beautiful decorative object.Note that the shape of the neck suggests this vase was originally designed as a lidded jar (lid missing).Please note: a few glazing flaws, a chip on the neck, and slight signs of wear from age; see photos.DimensionsMax. diameter: 27 cmDiameter at the neck: 13.5 cmDiameter at the base: 20 cmHeight: 36 cmAll photos are available at:www.antiques-delaval.com
