Diameter : 10 cm

Height : 18 cm

Description

An antique cylindrical measuring cup with a bent handle, of the "chopine" type, manufactured in the 19th century by the workshop of the Scatta brothers, master pewterers based in Chalon-sur-Saône (Saône-et-Loire).This workshop was primarily active during the second half of the 19th century, producing a series of capacity measures conforming to the metric system.This is a cylindrical pewter container with a volume of 1 liter, featuring a molded base (heel) and a flat, rectangular handle at a right angle--a design typical of French regulatory measuring vessels for liquids (wine, milk, oil, alcohol).The Scatta brothers' master potter's hallmark, bearing their full name and the city, is stamped on the underside of the vessel's base.The flat upper rim (the lip) features notches and small calibration
