crystal with the geometric precision of its cut elements.The carefully crafted crystal components capture and reflect light, creating subtle plays of brilliance and transparency depending on the viewing angle and ambient lighting.Early 20th-Century CraftsmanshipDating from around 1900, these candlesticks reflect the enduring interest, at the turn of the century, in precious and ornamental materials within European decorative arts.Their design, based on the assembly of individually cut crystal elements, gives them a unique architectural character, combining elegance and decorative richness--attributes traditionally associated with luxury tableware.The transparency of the material allows one to appreciate the sculptural composition of each piece without any interference from color, thereby highlighting the precision of the facets.A Stunning Decorative SetThese candleholders form a harmonious set, ideal for a symmetrical arrangement on a dining table, a mantelpiece, a console table, or a sideboard.Their refined proportions make them highly versatile: they blend seamlessly into both classic interiors and contemporary spaces, where natural materials and understated luxury are appreciated.Whether by candlelight or natural light, the cut crystal elements create magnificent reflections, enhancing their sculptural and decorative presence.Condition and Collectible ValueBoth candlesticks are in very good condition, a valuable asset for objects dating from the early 20th century. Their age, faceted design, and elegant proportions make them particularly appealing to collectors of antique decorative art, rock crystal objects, and refined table accessories.A superb pair of faceted rock crystal candlesticks, dating from around 1900; they combine a timeless design, the luminosity of a natural material, and a sophisticated decorative aesthetic.DetailsItem: Pair of candlesticksPeriod: Early 20th centuryDate: Circa 1900Style: Return to Classicism / Early Decorative ArtsMaterial: Rock crystal (natural quartz)Technique:
