Description

A 1960s sideboard crafted from teak, a fine example of Northern European craftsmanship. This piece stands out for its clean, functional lines, accentuated by a well-proportioned structure featuring hinged doors and central drawers--perfect for practical organization of the space. Although its current condition requires restoration, we can restore it to its original elegance thanks to our specialized workshops in Cambiago. Teak, prized for its durability and beauty, gives the sideboard a warm and inviting look, suitable for both vintage and modern interior designs. A piece that carries with it a touch of history and sophistication.MOMOMO0330219
