White Gold Pendant With Sapphires, Diamonds, And Aquamarine

1 200 EUR

Period : 20th century

Condition : Très bon état

Material : Gold

Description

This pear-shaped pendant captivates with the elegance of its shades of blue and the brilliance of its diamonds.At its center, a pear-cut aquamarine captures the light and reveals subtle reflections. It is highlighted by a setting of rose-cut diamonds, which is in turn accented by a crown of deep blue sapphires. The contrast between the azure hues of the center stone and the intense blue of the sapphires gives this piece a remarkable presence.The bail, also set with rose-cut diamonds, harmoniously extends the design.A refined pendant, where the geometry of the pear cut and the richness of the gemstones come together to create a piece that is both luminous and sophisticated.DetailsType: fine jewelry pendantMetal: white goldCenter stone: aquamarineSurrounding stones: diamondsOuter
