Atmos Clock In Chrome Metal. Jaeger-lecoultre. Circa 1950

9 500 EUR

Signature : Jaeger-LeCoultre

Period : 20th century

Condition : Bon état

Material : Chromium

Width : 17.5

Height : 23.5

Depth : 14.5

Description

This Atmos clock presents a parallelepiped cage in chrome metal entirely glazed, revealing the mechanism on all its faces. The annular dial with a white ground bears Arabic numerals and baton indices, its openwork centre allowing the movement to be admired; the rotating balance with faceted weights animates the lower part. The whole rests on a base with small chrome feet, with a lateral door for access to the mechanism.The Atmos clock, developed in the 1930s and perfected by the Swiss manufacture Jaeger-LeCoultre, is a horological masterpiece: its near-perpetual movement winds itself thanks to variations in temperature and atmospheric pressure, without any intervention. The chrome models of the mid-century are among the most elegant.Condition report: Good general condition.

Brilliant chrome with even patina, clear glazing with probable surface micro-scratches, fresh dial. Mechanism to be serviced by a clockmaker before regular use. An exceptional object, as fascinating on a mantelpiece as in a library.
