Senufo Divination Figurine, Cubist And Minimalist Style

1 200 EUR

Period : 20th century

Condition : Etat d'usage

Description

This magnificent Senufo horseman--a mythological and ancestral figure in Senufo culture--is an essential element on the Senufo shaman's altar. This explains the thick sacrificial patina covering it, made of chicken blood, beer, and millet flour. Note the somewhat abstract and very avant-garde composition, the horse, with its symmetrical front and rear, which complements the angular and slender forms of the rider; it is this type of object, with its very bold composition, that astonished artists at the beginning of the last century. Very good condition, height 45 cm on a pedestal.
