Material : Tin

Length : 20 cm

<https://www.proantic.com/en/335401-homogeneous-series-of-6-spoons-in-tin-17th-18th-century.html>

Description

The spoon reinforcement in "rat tail" is identical to that found on the silver models of the seventeenth and early eighteenth century. (See photo # 4 of a silver model that is not for sale, just for comparison). Only one has been used, the other 5 still bear the burnishing marks of their manufacture. Length: 20 cm. 17th-18th century. Very beautiful state. Free shipping by COLISSIMO for metropolitan France.
