

## Fragrance Vaporizer With Bronze And Shell

950 EUR

Period : 19th century

Condition : Bon état

### Description

In the register "composite objects" and from the same collection as our elephants "walnut", I am proud to present this spray perfume bronze and shell.

A hidden button above the baby's cap activates the mechanism and the liquid is sprayed through the mouth.

Both the crimp on the magnificent shell and the bronze carving, which was to be partially silvered at the origin, undoubtedly demonstrate the quality of this object ...

Total height 20 cm.

A small vis missing.

Do not hesitate to ask for photos or additional information by mail or phone.
