works of certain big sculptors of this time.
There is a very beautiful movement in this bronze, alive and kicking, we have the impression to see the wind passing in the hair of the children.
At the same time this bronze is performed with humor, with this very funny scene or one of child sits on the back the other who caught feathers of the tail of the cock with a roguish look, the cock staying with them and trying to defend itself.
Beautiful two putti everything in curvatures, very nicely treated.
A rare and high-quality bronze.
Attention big dimensions and weight very consequent.
