Description

Very beautiful vase of the workshop of the Old Mill, in Vallauris. This one was created after the war by three friends: Domonique Bodart, Robert Pérot and Jean-Claude Mallarmey. It is probably the latter who has decorated this beautiful vase. Their building was located above the current museum Vallauris and saw its large size, they built a large wood oven, which explains the nuances and variations of colors that make it its charm. Perfect condition for this vase.
